

The readable instruction is not the state that later controls the robot

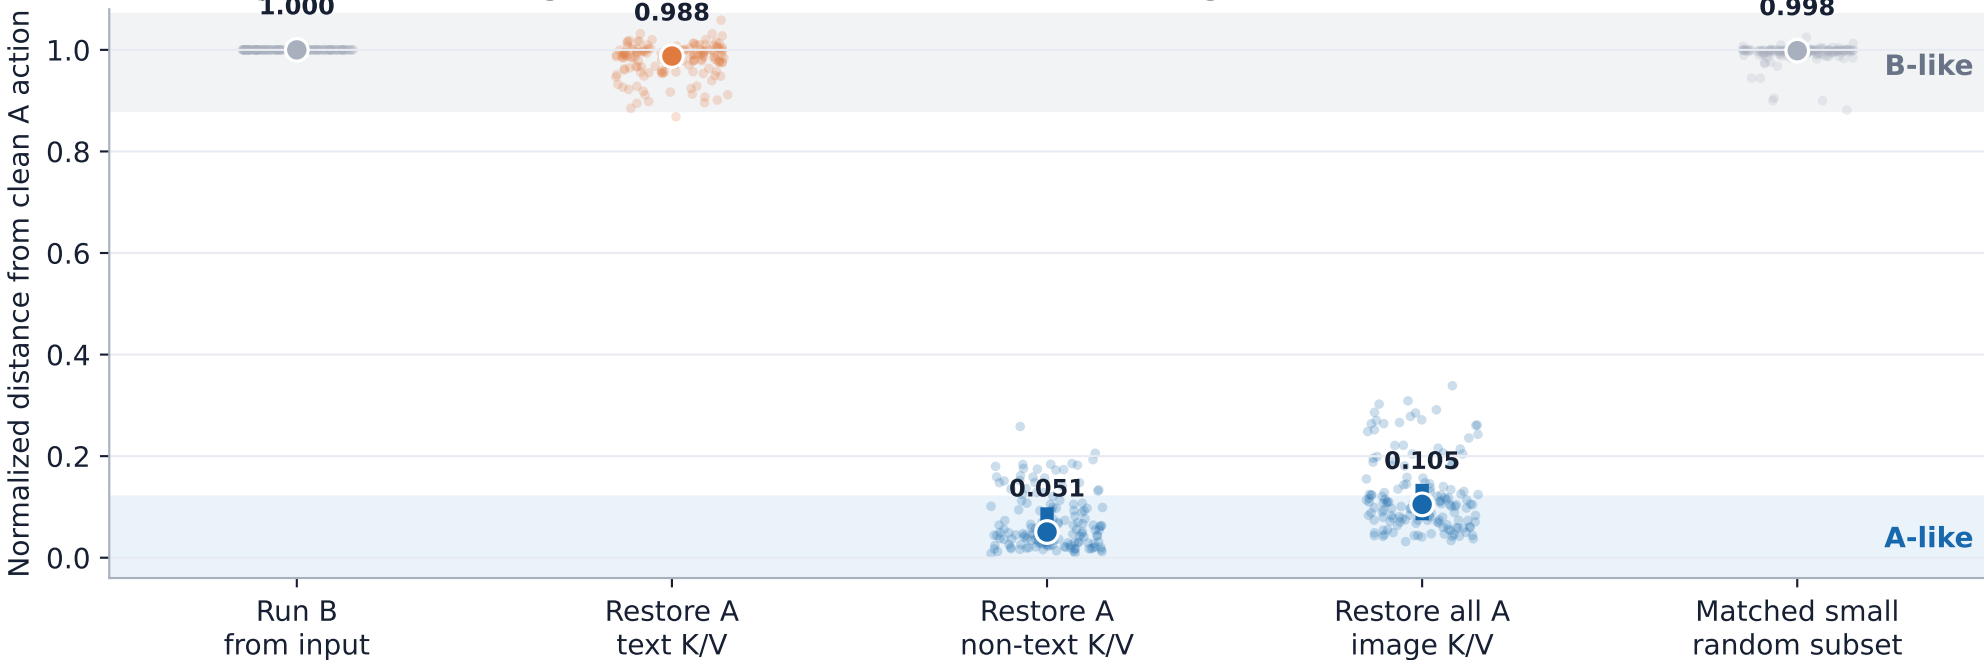

Same pixels and robot state; only the instruction or a targeted internal state changes.

a One scene, two valid commands

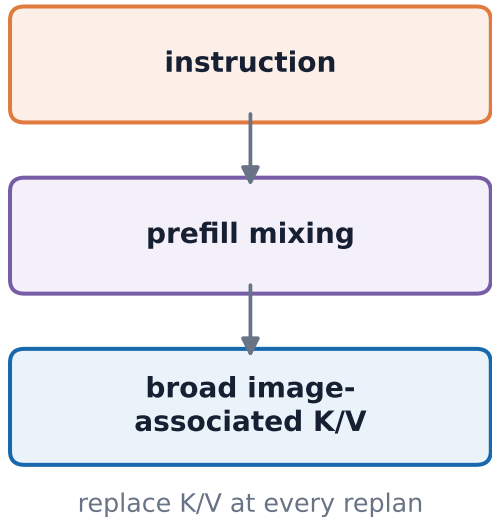

A pick up the alphabet soup and place it in the basket
B pick up the cream cheese and place it in the basket

b After B-prefill, restoring A's text state does almost nothing

c The intervention

d The broad late-state edit changes the robot's full behavior
